

Running example G : two K_4 blocks sharing edge (v_3, v_4) + two pendant triangles; 10 triangles at $s = 3$

(1,3)-core = 3

(1,3)-core = 1

Block A: $K_4(v_1, \dots, v_4)$

Block B: $K_4(v_3, \dots, v_6)$

shared edge (v_3, v_4)

pendant triangles T_1, T_2
